

Modern Minstrel

Mixing, Mastering, Editing, & Recording

Here are the House Specs for the Cedar Cultural Center in Minneapolis. The house system is capable of supporting FOH levels of well over 110db throughout the hall. We prefer that show volume be targeted at 85-95 DBSPL A-weighted average. The stage is on the long wall of the hall, so throws are short and most performers find that they need minimal monitors to perform comfortably. The hall holds 450 seated and 625 standing. The stage is 12' deep by 32' wide. We have no risers. Additional gear can always be provided if approved by the Cedar and/or at the Artists expense. Give me a call if you have any questions @ 612-414-8502 or email to cwfrymire@modernminstrel.com and/or cfrymire@thecedar.org

Audio

House Console - 48X8X6 Midas Legend 3000 (modified for 6 band EQ on both FOH and MON path)
